

Erik Dysthe joins Clevest Solutions Board of Directors

Richmond, B.C., 8-Jul-10- Clevest Solutions Inc., leader in Smart Grid deployment and Post-Deployment Maintenance software and provider of Mobile Field Force optimization solutions, announced today that Erik Dysthe has joined the company's Board of Directors.

Erik Dysthe, founder and former Chairman and CEO of MDSI has been working in the wireless communication business since 1984 and brings extensive experience and market understanding to boost Clevest Solutions rapid growth and market share.

"I am pleased to welcome Erik to our Board of Directors. Erik's wealth of experience and top notch calibre will help Clevest continue our growth and success. I admire Erik for his positive energy, integrity and determination to succeed," says Clevest Solutions' President and CEO Thomas Ligocki. "Erik not only has over 30 years of senior management experience but he has successfully established and as CEO guided for well over a decade the then-largest and most successful mobile workforce management company in the world."

Erik's 20+ years of experience as a CEO of a then-leading mobile workforce management company give him an in-depth knowledge and understanding – to perfectly complement Clevest Solutions' needs as a rapidly growing company with an innovative corporate culture. "I am very pleased to join Clevest Solutions. I have a passion for mobile data – and I believe that Clevest is today's best mobile workforce management solution on the market. Not only does Clevest leverage the current technologies to leapfrog the competition but the Clevest team has done a tremendous job to ensure that over the past year more utilities have chosen Clevest than any other Mobile Workforce Management Solution on the market," said Dysthe.

Prior to leading MDSI, Mr. Dysthe worked as VP of Marketing and Sales at Orcatron Systems and enjoyed a successful sales and marketing career in the petrochemical industry. Mr. Dysthe currently also serves on the board of DDS Wireless International Inc., Pacific BioEnergy Corporation and Wurldtech Security Inc.
