

***KamTech Systems Achieves Certified Partnership Status with Clevest Solutions to Deliver Integration Services for Smart Grid Deployments and Mobile Field Force Automation***

Atlanta, Georgia July 14, 2010

KamTech Systems, a leading software systems design, development, implementation and support company in the utility industry has achieved certification for integration services with Clevest Solutions Inc. Clevest is a leader in Smart Grid Deployment and Post Deployment Maintenance software and provider of a next generation Mobile Field Force optimization solution.

KamTech formed a strategic partnership with Clevest in 2009 and is pleased to expand their scope of integration and deployment services as a Certified Implementation Partner with Clevest.

Marcel Sarzen, President of KamTech Systems, states “We are very pleased to announce our partner relationship with Clevest Solutions as a certified Integration Partner. This partnership enables KamTech Systems to further expand our Smart Grid and Field Force Automation service offering. With this certification, our ability to expand the custom integration and interface development requirements for multiple platforms has grown exponentially. In addition, Smart Grid and AMI deployments supported by Clevest’s software solutions are in increasing demand and we can play an integral role as part of the deployment process.”

Thomas Ligocki, CEO of Clevest Solutions, states “We are delighted to elevate our partner relationship with KamTech Systems in order to address market demands and successfully meet the challenges of implementing Smart Grid/AMI deployments as well as innovative Mobile Field Force automation projects. KamTech’s presence in the Southeastern territory of the United States gives us a competitive advantage to service the U.S. marketplace needs for integration and individual development services”.

**About KamTech Systems:**

KamTech Systems provides consulting services for needs analysis and design, coding and testing, data conversion and maintenance for business information systems. KamTech Systems manages projects involving systems implementations, upgrades and enhancements. KamTech has more than twelve years of experience serving utilities, and was founded by industry experts who originally developed and delivered the Banner/Customer Suite CIS platform. KamTech is a subsidiary of ITLogica Inc., a global IT consulting services provider headquartered in Atlanta, Georgia.
