

# Clevest Mobile GIS

PREMIUM

Efficiently maintain network information by providing field workers with tracing, redlining, and the ability to capture asset edits in the field

## Key Benefits of Clevest Mobile GIS - PREMIUM

Pre-integrated with Esri's technology stack, the Premium edition provides:

**Network tracing:** Identify isolation points or impacted customers more quickly

**Redlining and annotation capabilities:** Identify changes or areas of concern while in the field

**Order-based asset edits:** Capture field updates to provide more accurate, up-to-date GIS information

**Review and approval of edits:** Sync changes to reduce paper, inefficiencies, and inaccuracies

**Consistent user experience:** Seamless online and offline experience

### Related product lines:

- Mobile Workforce Management
- Location Solutions
- Advanced Network Deployment
- Meter Reading

Inaccurate or out-of-date asset information in a utility's GIS can not only lead to network reliability issues but also frustration, confusion, and even safety concerns for mobile workers in the field.

View and maintain network assets more cost-effectively and efficiently with Clevest Mobile GIS – Premium, and equip workers with tracing tools, the ability to edit asset attributes, and capture redlines and annotations in the field as work is performed. The Premium edition can be deployed as a stand-alone solution or pre-integrated with Clevest Mobile Workforce Management or Automated Location Solution products for enhanced field operations and safety.

## How it Works

Leveraging Esri's SDK and Network Analyst, the Premium edition provides mobile workers with the ability to run traces of a feature or map service to investigate the utility's network, identify isolation points or connected customers, perform redlining/annotations, and update asset attribute information so that the utility has accurate GIS information that is in sync with the reality in the field.

Using mobile devices, workers can redline and annotate directly on maps, and save sketches and notes to a work order.

Utilities can extend the value of the Premium edition by adding Clevest Mobile Workforce Management workflows that enable field workers to capture asset edits. This allows workers to validate or update information and pass details back to the asset management or GIS teams, which reduces or eliminates duplicate data entry into various systems of record. The solution can also be combined with Clevest Advanced Network Deployment to plan, deploy, and maintain assets.

**Automate your workforce today with premium features such as:**

- As-built network tracing by phase
- Redlining

Query assets  
Visualize asset infrastructure  
Access Esri Basemaps  
Leverage geospatial awareness  
Improve safety  
Enhance visibility

Run network trace  
Create/share light redlines/annotations  
Capture field edits  
Work online and offline  
Visualize asset infrastructure

*Improve the accuracy of network information by providing mobile workers with access to basemaps and GIS assets on their devices, and to premium features to make updates in the field.*

## Why Clevest Mobile GIS?

In addition to the territory and network visibility provided by the Standard edition, utilities can maintain their network model with Clevest Mobile GIS – Premium to improve worker safety and ensure GIS data is kept up-to-date.

To enhance geospatial benefits, utilities can add one of Clevest's Location Solution products to visualize worker and vehicle locations in relation to the asset infrastructure for even more visibility and efficiency.

For utilities that use Clevest for mobility needs, the Premium edition delivers an unparalleled map-centric experience for workers and contractors while encouraging user adoption and reducing training requirements with its familiar and intuitive user interface.

## Looking to the Future

For additional business value, the Premium solution can be easily combined with other Clevest products or upgraded to Clevest's Platinum edition when utilities are ready to take operations to the next level.
