

# Clevest Mobile GIS

STANDARD

Improve situational awareness for mobile workers with quick and easy online and offline access to map and asset information

## Key Benefits of Clevest Mobile GIS - STANDARD

With native integration to Esri's technology stack, the Standard edition provides:

**Seamless online and offline worker experience:** Keep workers working despite the lack of solid connectivity

**Visibility into the asset infrastructure:** Provides geospatial context for work

**Asset and address search:** Identify asset and work locations quickly and easily

**Asset filtering:** Find and investigate assets that share common attributes

**Say goodbye to printing and distributing paper maps, and enhance safety and efficiency in the field!**

Clevest Mobile GIS – Standard gives mobile workers an up-to-date, reliable geospatial context for their work by providing them with real-time access to map and asset information, whether they are working online or offline.

With quick and easy access to reliable service territory and asset infrastructure information, the Standard edition empowers technicians to quickly and efficiently navigate to work locations, query asset information to verify or inspect what is deployed in the field, and perform work at higher levels of safety and productivity.

### Related product lines:

- Mobile Workforce Management
- Location Solutions
- Advanced Network Deployment
- Meter Reading

## How it Works

The Standard edition leverages Esri feature services and local digital map packages to provide a seamless experience for workers who need territory and asset information in both connected and disconnected (e.g., underground, rural) environments.

Utilities can augment the Standard edition with pre-integrated Clevest Mobile Workforce Management or Clevest Automated Location Solution products to drive greater operating efficiencies, worker safety improvements and customer satisfaction.

**Automate your workforce today with standard features such as:**

- GIS layers (WorkBook and WorkSpace)
- Online and offline support

Query assets  
Visualize asset infrastructure  
Access Esri basemaps  
Leverage geospatial awareness  
Improve safety  
Enhance visibility

Work online and offline  
Visualize asset infrastructure  
Access Esri basemaps  
Leverage geospatial awareness  
Improve safety  
Enhance visibility

*Give mobile workers exceptional situational awareness with access to maps and asset information on their mobile device, whether they are working online or offline.*

## Why Clevest Mobile GIS?

For utilities just beginning their mobility journey, the Clevest solution makes an excellent starting point for – or addition to – your mobile workforce management solution with the flexibility to scale and expand according to business needs and budget.

Utilities who partner with Clevest for all of their mobility needs are provided with an unparalleled enterprise-grade experience, which includes Clevest's WorkBook and WorkSpace applications.

**Clevest's WorkBook mobile application** supports a wide range of work in the field on a variety of devices (e.g., smartphone, tablet, laptop) using iOS, Android, or Windows operating systems.

**Clevest's WorkSpace office application** provides dispatchers, supervisors, and managers with the ability to manage their entire field operations safely and efficiently using integrated maps and asset information and interoperable views of orders, workers, vehicles and more.

For additional business value, the Standard solution can be easily combined with other Clevest products or upgraded to Clevest's Premium or Platinum editions when utilities are ready to take operations to the next level.
